## Who am I?

Someone who finds joy in every little detail. I'm a design and creativity lover from scratch.

Since I started to play with design tools back in 2006, I've never surrendered to my hand-drawing skills and realised that I could do anything on the screen. So in 2008, I studied Multimedial Design in Buenos Aires to become a pro. Nowadays I'm a Wordpress specialist, coding and designing any kind of business solution.

I enjoy life next to my lovely wife. Food, friends, sports, music, photography or any kind of art and DIY projects is what I do in my free times.

**Ambitions?** Feel free to ask me. I've many.

## Education

Green College International - 2002  
7th year.

Instituto Modelo Santa Teresita - 2003  
Bachelor in science.

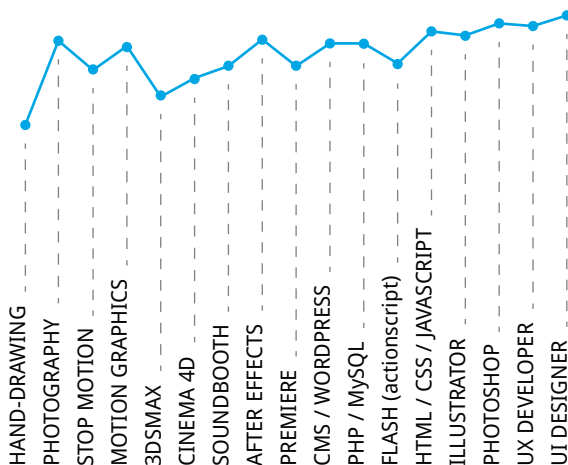

Secretaría de Turismo y Deporte de la República Argentina - 2004  
Lifeguard.

Escuela de Arte Multimedial Da Vinci - 2011  
Multimedia Designer.

### Everyday learner

To keep up with technologies and trends I read a lot of blogs, inspiring websites, podcasts, books, conferences and workshops. I test everything up by myself to get a real idea of how things work, offering me a wide scope of what I could do with the new "stuff".

## SKILLS

## EXPERIENCE

YPF Mar de Ajó (Argentina) - 1997.2007  
General Manager with 40 people in charge.

### Freelancer - From 2009

This includes many works as graphic designer for clients and non-traditional marketing for agencies. Web consultancy, design and development. Motion graphics, video and audio edits. 3D modelling and rendering for both characters and architectural rigs.

### DM Dima (Madrid - España) - From 2011

UI & UX Developer - Interactive designer. Working as fixed freelance.

### What you should know...

I love what I do. And I'm very self confident with my expertise. Sometimes, when you have tons of works ahead for clients, and not enough time for self projects, the portfolio is "a bit" limited to what your client needs and pays. In my case, my portfolio is always outdated because I don't want to spend my "free" time working. To be honest, if you need anything, just ask me if I can do it. I won't let you down at all.

Be happy, enjoy life, and keep in touch.  
Even for a beer (=)  
Cheers!
